About The Transformational Goals

What is important to us?

- The dangers and precautions of city transportation
- Gives a new perspective on what our world could look like without an over dominated vehicle life.
- Show how a less car dominated society can help make the world around you better.

Targeted Audience

- High school & Middle school students (13-18 yrs old)
- Interested in public transportation
 - Getting from “A” to “B” efficiently without always driving a car.
- Disinterested in the modern day city layouts

About The Art

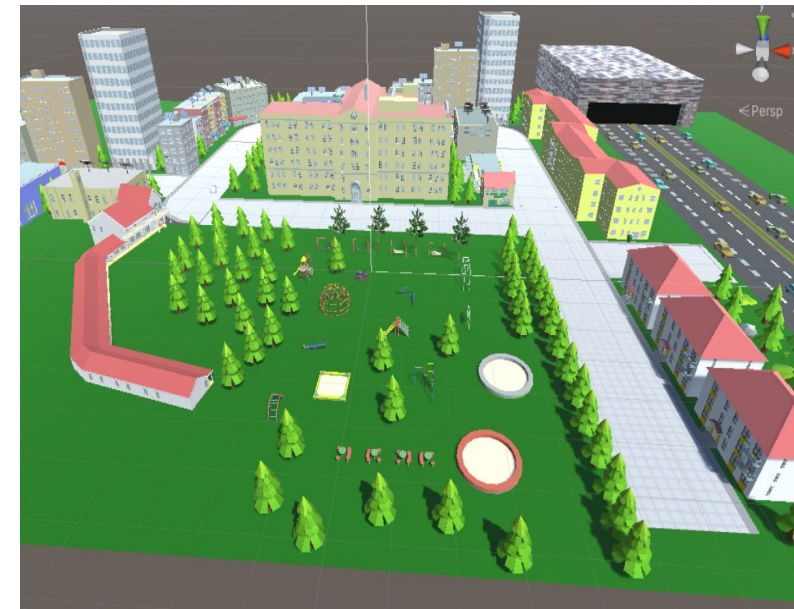

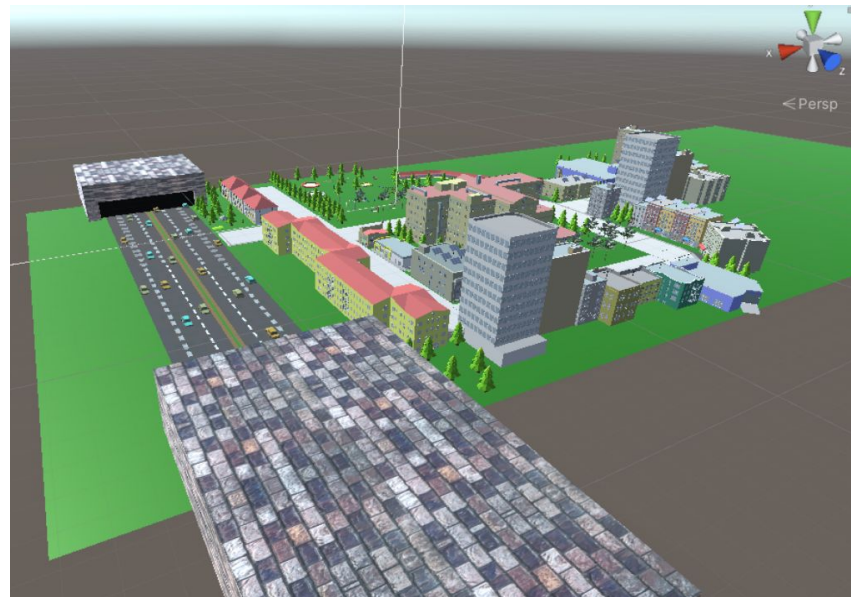

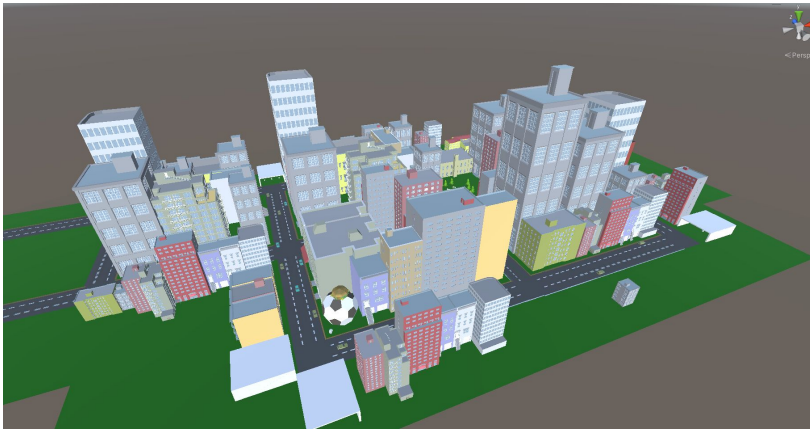

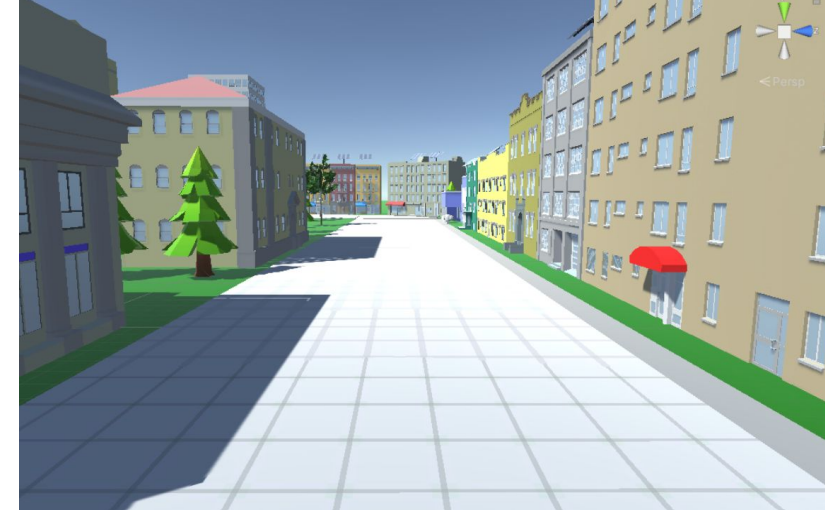

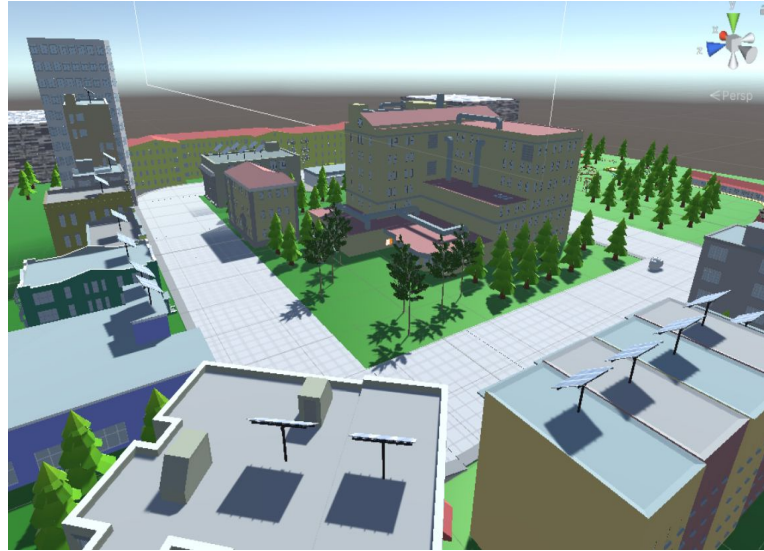

- Happy environment
- Relaxed cool tone color palette
- Simple

Hannah Kim, Graden Olson, Daxen Prajapati, Craig Pulford

About The Design

- Distinct difference Walking/Driving City
- Busy City driving one side
- Tranquil environment in walking city

About The Code

Waypoint system

- Always on HUD
- Tells distance between player and objective
- Switches to next objective when you reach your destination
- Used Queues to load in each destination

Car System

- move in straight line
- position resets when it reaches end point

Level Complete Screen

- When you reach the last destination you get a level complete screen
- Tells you the time on each lap and the overall time
- Also has high score system
